

3M™ Scotch-Weld™ Structural Acrylic Adhesives

Next Generation Adhesives From 3M

Features & Benefits:

- Low odour grades for a comfortable working environment
- DP8805NS can reach structural strength in **less than nine minutes!**
- Bonds powder coats and other difficult-to-bond materials
- Suitable for pre-powder coat bonding
- Elevated temperature performance to maintain strength at 180°F (82°C)
- Low exotherm, ideal for heat-sensitive substrates
- Non-sag formulation for vertical or overhead applications
- DP8405NS excellent impact resistance compared to ordinary acrylic adhesives
- 18 month shelf life - no refrigeration required

Solving the Challenges of Speed, Strength and Shelf Life

Next Generation Structural Acrylic Adhesives from 3M bond faster and deliver higher impact resistance, helping you to build better products and improve productivity.
